PROFESSIONAL PROFILE

Final-year Computer Systems and Networks Engineering student and full stack software developer. I build web applications that digitise how real businesses operate —work orders, inventory, invoicing and accounts receivable— and I own the whole cycle: process analysis, development, server deployment and maintenance. Two of my systems are in production and in daily use today.

EXPERIENCE AND PROJECTS

SGTT — Workshop Management System
2026 — In production

Taller Tony · Personal project

- Analysed the workshop's operating process and modelled the complete database.
- Built the React frontend and the Node.js/Express REST API on top of SQLite.
- Deployed to a Linux VPS with nginx as a reverse proxy, HTTPS, PM2 and automated daily backups.
- Records are voided with an audit trail (user, date and reason) instead of deleted, so the accounting history stays intact.

Stack: React · Node.js · Express · SQLite · JWT · nginx · PM2 · Linux

Distribuidora de Huevos Escobar — Sales and inventory system
2025 — In production

Personal project

- Sales, inventory control and accounts receivable system that replaced the business's daily paper records.
- Designed the flow so a sale, the stock and the customer's balance always stay consistent with each other.
- JWT authentication with hashed passwords, and separate roles for administration and day-to-day operation.

Stack: JavaScript (ES Modules) · Node.js · Express · SQLite · JWT · CSS

Web development and process automation
2024 — present

Independent projects

- Custom web solutions for small businesses, aimed at digitising manual processes and cutting data-entry errors.
- Requirements gathering with the users, full stack development, production deployment and training.

Stack: JavaScript · Node.js · SQL · Git · Linux

EDUCATION

B.Eng. in Computer Systems and Networks Engineering — 5th year — graduating soon
Universidad Gerardo Barrios

Technical Baccalaureate in Electronics and Electricity
Instituto Capitán de Navío DEM César Yanes Urías

CERTIFICATIONS AND AWARDS

2nd place — Social Impact category · Latin American Innovation Rally · team Limit Not Found — Oct 2026
CCNA: Enterprise Networking, Security and Automation · Cisco Networking Academy — Jun 2025
Network Devices and Initial Configuration · Cisco Networking Academy — May 2025
CCNAv7: Introduction to Networks · Cisco Networking Academy — Aug 2024

TECHNICAL SKILLS

Frontend: React, Next.js, TypeScript, JavaScript, Tailwind CSS, HTML, CSS
Backend: Node.js, Express, REST APIs, Server Actions, JWT, bcrypt
Databases: PostgreSQL, MySQL, SQLite
Infrastructure and tools: Linux (VPS), nginx, PM2, Git, GitHub, Vercel, VS Code, Postman

LANGUAGES

Spanish (native) · English, intermediate (B1–B2)
